

ARTIK EXTREME

CREATIVE FILM PRODUCTION COMPANY

We make possible to create any imaginary world by combining extreme outdoor video shooting, 3D technology and VFX.

Artik Extreme offers a film production and creative service for advertising campaigns, documentaries and shows. We conceive, develop and produce entire creative and advertising projects, and we offer highly specialised support for the filming of external productions.

PLANET SNOW

Artik Extreme offers every element to produce the most difficult snow projects.

PLANET SNOW CREW

Artik Extreme snow crew is composed of Talents and Camera Crew,
ready to perform even in the most difficult conditions.

— CAMERA STUNT —

— TALENTS —

-CREW- CAMERA STUNT

Artik Extreme camera crew consists of specialized operators and camera stunts – skiers, snowboarders, mountaineers and ice skaters – which are trained and equipped to realise static or follow shots on mountain summits, steep and snowy slopes, snowparks and ski resorts around the world.

CREW

-CREW-

TALENT

Artik Extreme also manages a vast network of talents (athletes and stuntmen), prepared to participate as subjects in the most adrenaline-fuelled outdoor projects.

PLANET SNOW

VEHICLES

Artik Extreme vehicles – Snow buggy, Snowmobile and Helicopter – can be used to film projects as well as for crew support in snowy conditions.

SNOW MOBILE

HELICOPTER

SNOW BUGGY

VEHICLES

-VEHICLE-

SNOW MOBILE

The snowmobile makes it possible to reach the steepest and most difficult snowy slopes. It is therefore a perfect vehicle for support and filming in high mountains, thanks to the possibility of attaching a medium-sized camera crane jib arm with a movie camera to the front and rear

VEHICLES

-VEHICLE-

HELICOPTER

Medium-sized helicopter which could be equipped with a stabiliser and a movie camera.

The helicopter provides the widest, smoothest and fastest aerial shots, and it makes it possible for the crew to reach the most inaccessible locations.

VEHICLES

-VEHICLE- SNOW BUGGY

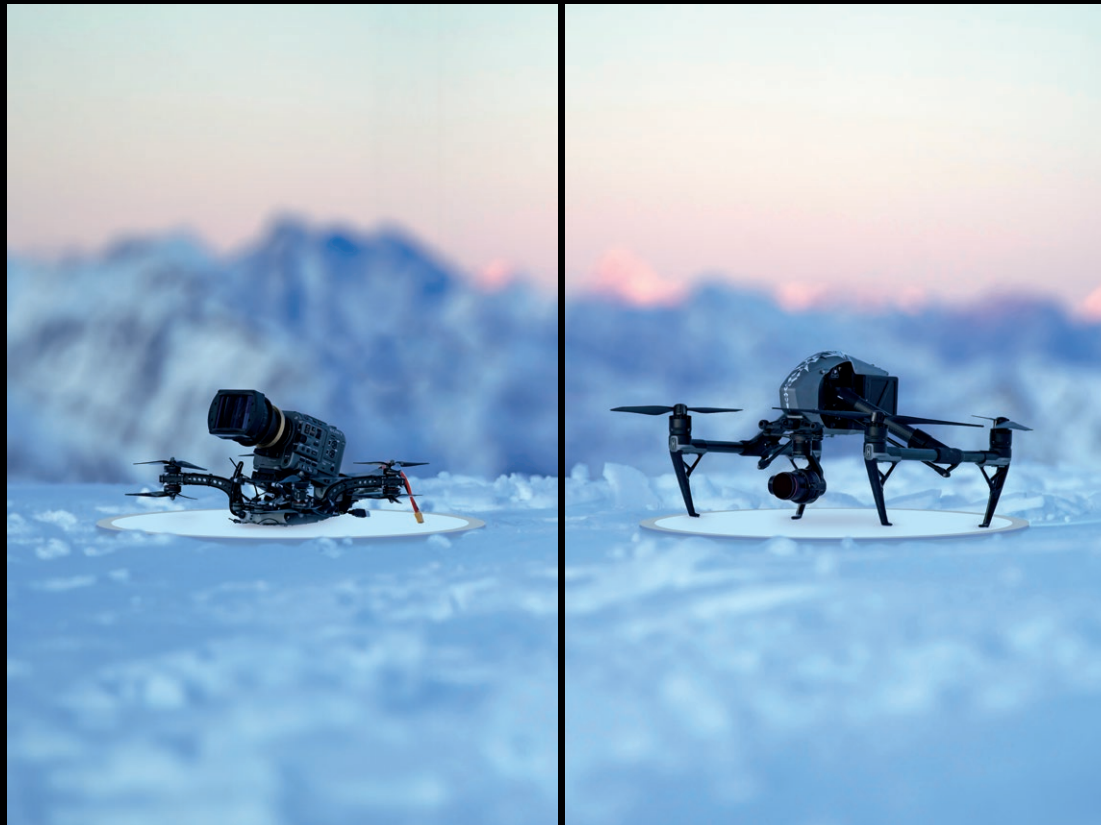

A four-wheel drive vehicle powered by a 170+ horsepower engine. This vehicle tackles all types of terrain thanks to its racing suspension and knobby tyres, interchangeable with snow-specific crawlers.

The buggy allows for exceptional footage at high speed, as it could be equipped with a camera crane jib arm (Russian Arm) and a movie camera, both with remote control. The snow buggy is also perfect as support vehicle during productions.

PLANET SNOW DRONES

Artik Extreme drones – Cinematic and FPV – can film stable panoramas as well as highly dynamic footage. Our operators are able to carry and fly the drones over mountain peaks and down snowy slopes.

— CINEMATIC DRONE — — FPV DRONE —

DRONES

-DRONES-

CINEMATIC DRONE

Large drone with a long flight autonomy, able to maintain stability even in very difficult weather conditions. This aircraft allows for extremely stable and panoramic RAW aerial shots, as it is equipped with an independent camera whose movements are remotely controlled by a specialised operator.

DRONES

-DRONES- FPV DRONE

Carbon fibre competition drone, which allows for fast and breathtaking footage. This aircraft is remotely controlled through a visor, and can also be equipped with large cinemacameras.
